

PROFESSIONAL CERTIFICATION

Frontier AI Governance

AWARDED TO

Luiz Felipe Piochi

Earners of this certificate have successfully completed the Frontier AI Governance Course, a 30-hour program with BlueDot Impact. They can critically evaluate frontier AI capability assessments, map institutional power and dependencies across the governance landscape, and translate technical developments into policy-relevant analysis. They have engaged with competing governance frameworks, stress-tested them against crisis scenarios and competitive dynamics, and taken a defended position on a contested governance question. They leave with a concrete plan for where and how they will contribute to the governance of frontier AI.
